Weekly Report to the Commissioners

Department Reports on Non-Routine Activities

Roads and Bridges

- The Roads and Bridges Department is evaluating Charter Amendment #2002-01 which prohibits commercial traffic on County Roads except those vehicles that have a point of origin or a point of destination within the County, that can be reached by no other route.
    - The concern is commercial traffic at maximum load limits and high enough frequency to damage a road beyond normal wear and tear; (beyond what taxpayers can afford to repair or maintain). That threshold is unknown and we need to figure that out, so that we do not recommend changes that are too restrictive.
    - It may be necessary to adopt a fee/ton schedule if large-scale shippers are unwilling to contact the County or enter into road use agreements.
- Temporary patching of Lincoln Road between 260 and 270 Roads will begin after Labor Day.
- A gravel truck was tipped over off a concrete box drainage structure, just north of the intersection of Marble and 80 Roads. The driver was not injured. It appears from initial measurements that the rear half of the frame may be twisted 3 degrees to the passenger side of the box. The truck was full of gravel. The incident has been reported, and KCAMP is scheduling an inspection.
- A dust control palliative was applied to 70 Road south of US-36 for 8/10's of a mile. Nesika Energy is beginning to receive harvest truck traffic. Under ideal conditions, this will greatly reduce the amount of dust, heavy truck traffic will generate for about 30-60 days.
- Repairs to two City Streets in Narka have been completed. We hope to seal and sand those streets in a few weeks. The City of Narka is reimbursing the County for materials.
- Asphalt patching continues throughout the County. Hot oil patching of Fir and 10 road will be performed again just before the sealing of 10 Road on the Jewel County Line occurs. We will be assisting the City of Belleville in several sealing projects late in September. We are meeting with the City of Scandia to determine what they can afford to seal before this season ends.
- The Roads and Bridges department entered into an agreement with CAT representative Foley Equipment to provide 1,000-hour servicing and inspections on our CAT Motor Graders. This service includes electronic monitoring of equipment and testing of oil samples at 500-hour intervals.

Community Concerns

ID	Description	Notes/Progress/Resolution	Status
Administration			
132	170 Road from intersection to .8 miles south of US 36; road and drainage improvements are needed.	Investigating solutions and impacts on adjacent properties.	Open
